

To whom it may concern; I would like to comment on the bill that would affect our constitutional right at the first amendment. As americans we should be able to listen to anything we want it is our choice to make. XM radio has changed the lives of all those who work away from home as my husband does. His traveling experience is more enjoyable now and he can listen to anything he wants without interuptions of commercials like the regular radio shows. Its a whole new experience and he would never go back to normal radio again. When you travel to diffrent states and know that you dont have to worry about the weather you can listen at anytime at your convienence. XM radio has made my husband very happy it was the best fathers day gift our children could have given him. Its been over 3 years and he loves it please make sure we can count on our government to realize it isnt there place to tell us what we can listen to.

Thank you,
Mr.& Mrs Jorge Bueno
